ACES

Access Certificates for Electronic Services

Digital Identity Solution for:

Federal, State and Local Government Agencies

ACES was created by the Government, for the Government, to secure electronic transactions.

IdenTrust ACES Digital Certificates

General Services Administration's Digital Identity Solution

Access Certificates for Electronic Services (ACES)

With the advent of technology, government business processes have undergone tremendous change. Transactions that were traditionally paper-based are being converted to more secure and efficient online formats. Many government websites now require users to obtain a Public Key Infrastructure (PKI) credential that provides real time validation during authentication when accessing sensitive information and a digital signature for use with electronic documents. IdenTrust digital certificates

also ensure non-repudiation.

ACES, a program created by GSA, offers e-Authentication Assurance Level 3 PKI digital certificates as an electronic form of identification to facilitate secure online access to government information and services.

IdenTrust was the first GSA approved Certificate Authority to issue ACES digital certificates for use between businesses, consumers, and government agencies.

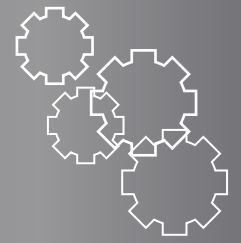

AGENCY PARTICIPATION

- General Services Administration (GSA)
- Department of State (DOS)
- Internal Revenue Service (IRS)
- Environmental Protection Agency (EPA)
- Drug Enforcement Agency (DEA)
- State of Virginia
- State of Washington
- State of Florida
- State of West Virginia
- State of North Carolina

secure solutions
for your
business needs

SOLUTIONS

ACES Business Representative Certificates

Authenticate yourself to gain access to a PKI-enabled application or digitally sign electronic documents on behalf of your organization with an ACES Business Representative certificate. This can be compared to a company ID. This certificate is an electronic credential that asserts your identity and your affiliation with your organization.

ACES Unaffiliated Individual Certificate

Authenticate yourself to gain access to a PKI-enabled application or digitally sign electronic documents on behalf of yourself as an individual with an ACES Unaffiliated Individual certificate. This can be compared to a driver's license or passport. This certificate is an electronic credential that asserts your identity.

ACES Device Certificates

ACES offers agency application TLS/SSL server certificates and VPN IPsec client certificates that enable authenticated and encrypted data communications with servers and applications. Device certificates allow mutual authentication and/or encrypted TLS/SSL and VPN communications between devices operated by federal, state and local government agencies.

BENEFITS OF USING ACES DIGITAL CERTIFICATES FOR ELECTRONIC PROCESSES

- Allows quicker access to data
- Reduces errors and improves accuracy
- Saves money on printing, postage and storage fees
- Minimizes the burden placed on document filers
- Used for electronic transactions inside and outside government agencies
 - C2G (Consumer to Government)
 - B2G (Business to Government)
 - G2G (Government to Government)
- Certificates meet NIST SP 800-63 multifactor authentication requirements
- Certificates are NIST e-Authentication Level 3
 - Certificates are cross-certified with the Federal Bridge
 - Certificates provide non-repudiation

ACES allows secure transactions between:

- Business to Government (B2G)
- Government to Government (G2G)
- Consumer to Government (C2G)

Agencies can enable government applications to require:

- Logical access control and authentication with real time validation
- Digital signatures for submission of electronic forms which are non-repudiable

All you need is **ONE.**

One **IdenTrust** ACES Certificate can be used with multiple participating government agencies.

FOUR SIMPLE STEPS TO OBTAIN AN ACES DIGITAL CERTIFICATE:

- 1. Apply online at www.IdenTrust.com**
 - Select the certificate you need
 - Click “buy” to begin the application
 - Download required forms and follow instructions
 - Part 1 Sponsoring Organization Form
 - Part 2 Notary Form
 - Provide payment (credit card or voucher number)
- 2. Identification**
 - IdenTrust registration staff will receive your online application
 - IdenTrust registration staff will receive your mailed paperwork
 - IdenTrust will validate your identity using independent sources
- 3. Approval**
 - You will receive emails from IdenTrust during the process to inform you of the status of your application
- 4. Digital Certificate Retrieval**
 - Once your application is approved, you will receive a confirmation letter in the mail containing an account number and retrieval code with instructions to download your certificate onto your computer, smart card or token. You will have 30 days from the time we receive your paperwork to download your certificate.

FLEXIBLE BULK REGISTRATION

Identification and authentication aligned with the specific needs of small or large subscribing organizations, including online registration for individuals and bulk load registration for groups.

Bulk Loading: The IdenTrust Bulk Load process is intended to simplify the purchasing process when registering 25 or more individuals within your organization. In order to bulk load certificates to IdenTrust, a representative from your organization will be appointed as a Trusted Agent who will provide us with identification information for at least 5 applicants for each submission.

Trusted Agent: An individual within a subscribing organization who is approved by IdenTrust to act as a Trusted Agent and perform identity verification tasks on behalf of the organization.

LRA Central: A web based interface that can be used by an approved Registration Authority within your organization to manage the accounts of its IdenTrust ACES subscribers.
